

DCI/IC 151S-74

28 June 1974

MEMORANDUM FOR: [REDACTED]

THRU : [REDACTED]

SUBJECT : Use of [REDACTED] by Project KIQ

1. The Applications Division of [REDACTED] is supporting the IC Staff by developing a computer system called KIQ. The system will process data related to the Key Intelligence Questions Evaluation Process being monitored by the Intelligence Community Staff for the DCI.

2. The computer support system being developed plans to utilize [REDACTED] to input data over Delta Datas. Accordingly, the IC Staff would appreciate priority being given by SED to any debugging of problems that arise in the development and use of [REDACTED]. In addition, since KIQ will be a continuing application, it is important that [REDACTED] be available without interruption during any conversion of CP/CMS from one computer system to another.

3. [REDACTED] of the [REDACTED] Applications Division is the AD project leader on KIQ. I am sure he can answer any questions which you may have concerning KIQ's use of [REDACTED]
